

TECHSHIP INTERNSHIP

Day 7 – Styling, Props, State Management, Dynamic Routing & API Integration

Submitted by : Janet Naveena

Date : 09-06-2026

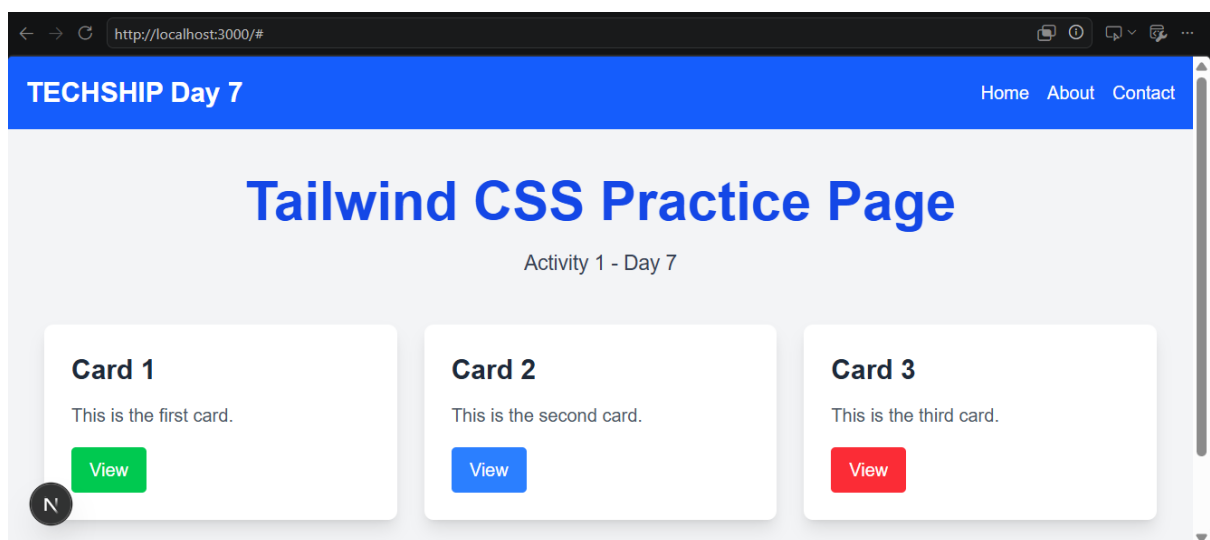

During Day 7 of the TECHSHIP Internship Program, I learned how to style web pages using Tailwind CSS. I created different UI elements such as a navigation bar, cards, buttons, and layouts. This helped me understand how to make web pages look clean and responsive.

I also learned how to use Props and State in React. Using Props, I passed data between components and created reusable Student Cards. Using the useState hook, I built a Counter Application that updates the count dynamically when buttons are clicked.

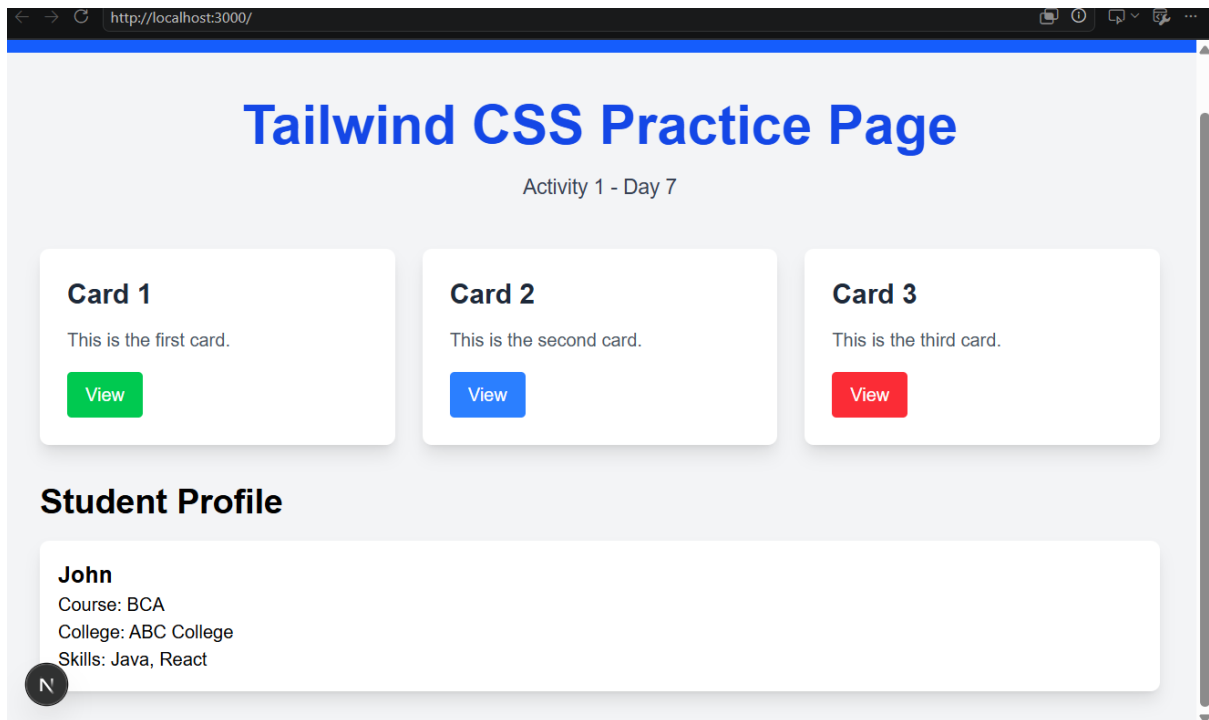

Another important topic was Dynamic Routing and API Integration in Next.js. I created pages that display different student and product details based on the URL. I also fetched user and product data from APIs and displayed it on the webpage. Overall, Day 7 helped me improve my understanding of Next.js and building interactive web applications.

Activities

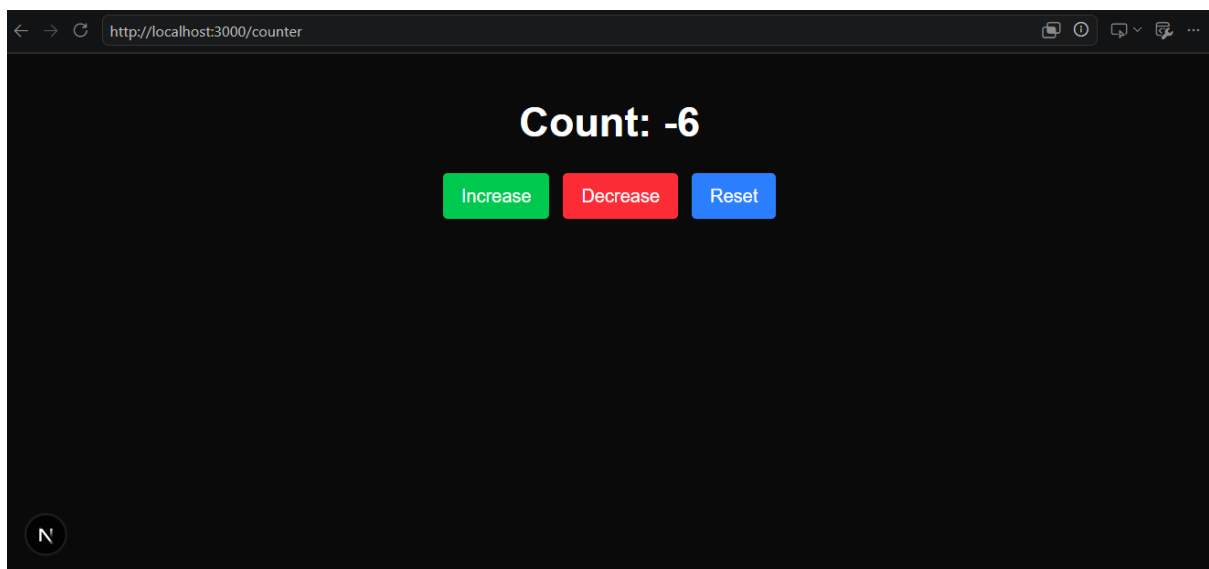

Activity 1 – Tailwind Practice Page

Activity 2 – Student Profile Component

Activity 3 – Counter Application

Activity 4 – Dynamic Student Pages
