

TECHSHIP INTERNSHIP

Day 4 – DOM Manipulation, Events & Form Handling

Submitted by : Janet Naveena

Date : 04-06-2026

On Day 4 of the TECHSHIP Internship Program, I learned about DOM Manipulation, Events, and Form Handling in JavaScript. I understood how the Document Object Model (DOM) represents a web page and how JavaScript can access and modify HTML elements dynamically. Through the exercises, I learned to change content, update styles, create dynamic lists, handle form submissions, and validate user input.

The most challenging part of the assignment was implementing form validation and displaying appropriate error messages for different input fields. It required careful use of conditions and event handling.

I learned that JavaScript makes websites interactive by responding to user actions such as button clicks, typing, form submissions, and mouse events. Instead of reloading the page, JavaScript can instantly update content, display messages, validate data, and create dynamic user experiences. Overall, Day 4 improved my understanding of frontend development and helped me build more interactive web applications.

Exercises

Exercise 1 – Change Text on Button Click

Switch Theme

Exercise 3 – Live Character Count

Characters Typed: 6

Exercise 4 – Student Information Card

Name:

Course:

College:

Student Information

Name: Janet Naveena

Course: Btech

College: Aisat

Exercise 5 – Dynamic List Creator

- JavaScript
- Html
- Css

Exercise 6 – Simple Calculator

Result: 5

Result: 1

Challenge Problems

Challenge 1 – Age Validator

Age Validator
